

Mentorship Medal Nomination Form

The Mentorship Medal

Mentorship is recognized as a critical part of professional and academic development and is vital to the health of any professional community.

The Canadian Federation of Earth Sciences / Fédération canadienne des sciences de la Terre (CFES/FCST) Mentorship Medal was created in 2008 to recognize the sustained and inspirational mentorship of colleagues and employees including peers, graduate students, undergraduate students and technicians. The medal was set up in honour of Paul F. Williams, a geologist known for scientific and mentoring excellence, candour and integrity.

The CFES/FCST Mentorship Medal is awarded annually to an individual from Canadian academia, government or industry.

Criteria

The sole criterion for the medal is excellence in mentoring over a sustained period of time.

There is no established definition of what constitutes good mentoring. Some qualities of a good mentor are:

- A good mentor is enthusiastic, inspirational, sensitive, supportive, forthright and constructively critical, committed to the mentee regardless of age or career goals.
- A good mentor provides intellectual leadership and acts as a successful professional role model.
- A good mentor fosters the development of talents and has the ability to recognize and nurture potential and to bring out the best in mentees.
- A good mentor provides emotional support, encouragement and essential strategies for a future career and has a continued interest in the mentee's professional advancement.
- A good mentor helps mentees to achieve professional goals with e.g. career transitions, setting up their own business or any other aspect of professional development.

The following article gives examples and analyses of what good mentoring is:

Lee, A., Carina Dennis, C. & Campbell, P. 2007. Nature's guide for mentors. *Nature* **447**, 791-797, doi:10.1038/447791a.
